Protecting People, Products & Processes

Blood and Bodily Fluid Solidifier

In today's environment, people who come in contact with blood and bodily fluid waste products run the risk of exposure to potentially infectious hazards. Luvmedical offer you a quick and easy way to clean up and deodorize potentially dangerous blood and body fluid spills that may occur in your place of business.

Safetec fluid solidifiers are OSHA compliant, designed to encapsulate, deodorize and contain potentially infections blood and body fluids. Fluids become a semi-solid gelled mass that do not break down or revert back to liquid form.

Once a spill has occurred, simply sprinkle product on spilled **Blood, Urine, Vomit**, or other potentially hazardous waste and the fluid is encapsulated in seconds. Just scoop-up the granulated gel with a broom and dustpan than dispose in accordance with facility policy.

Description	Case Quantity
1oz. pouch	100/case
2oz. pouch	100/case
5oz. shaker btl	24/case
10oz. shaker btl	12/case
15oz. shaker btl	12/case
